

**CIRCUIT**

- Extremely stable friction levels
- High temperature ability – up to 920degC
- Suitable for professional and endurance racing
- The very best modulation for driver control
- No fade
- Very low disc wear

M207 is the Heavy Duty brake pad in the CIRCO range. This pad has exceptionally consistent torque characteristics at all temperatures making it a must have for professional circuit racing at the very highest levels. M207 is extremely capable at higher temperatures where other compounds simply give up.

**Temp Range**  
250-920°C

**Friction**  
0.45-0.56Mu

**Material**  
Carbon Metallic

**Notes**  
High Friction
