CIRCO Racing Brake Pads : Comany Information

CIRCO P/L is an Australian owned company developing CIRCO racing brake pads for motorsport use. These pads are 100% manufactured in Japan and shipped worldwide.

CIRCO Racing Brake Pads are proprietary compounds designed to CIRCO specifications for specific applications. Whilst there is a comprehensive range available for use today, there are also many OE opportunities for manufacturers looking to tailor a brake pad compound for their own specific applications.

Some teams using
CIRCO Racing Brake Pads....

Racetorque Team MRF Skoda R5

Team Tekno GT McLaren

DPO Racing - Race WINNER Bathurst 6hr

Dale Patterson GT3 Camaro

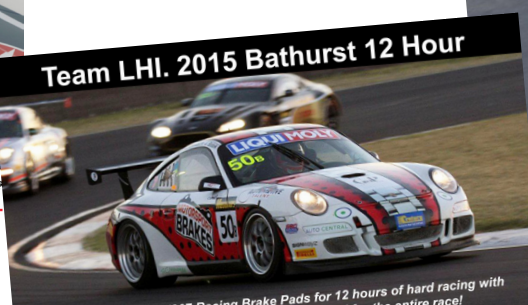

Triple Eight Race Engineering

Scott WRX Time Attack

Team LHI. 2015 Bathurst 12 Hour

JTG Daugherty NASCAR SPRINT CUP

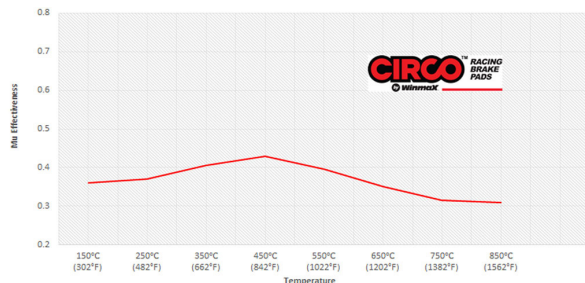

Glenn Seton. Ford Mustang TCM 2015

CIRCO Racing Brake Pads : Compound Information

CIRCUIT Medium Duty

Circo M111
Friction vs Temperature

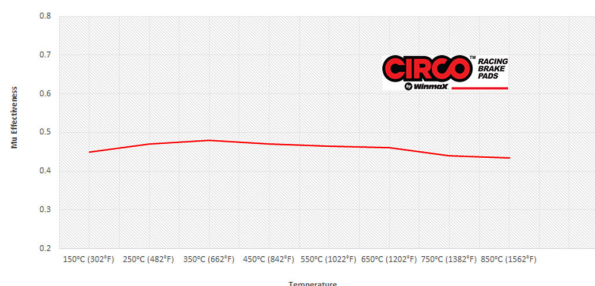

M111 is a racing brake pad designed for circuit racing cars with brake booster fitted.

This compound starts at relatively low friction levels to take away ABS interference early in the stop. A very consistent pad with very good modulation combined with low wear rates.

Temp Range	Friction	Material	Notes
180-780°C	0.31-0.49 <i>Mu</i>	Carbon Metallic	Circuit Mid Level

RALLY Professional

Circo M119
Friction vs Temperature

M119 is a specially formulated brake pad for gravel and tarmac rally use.

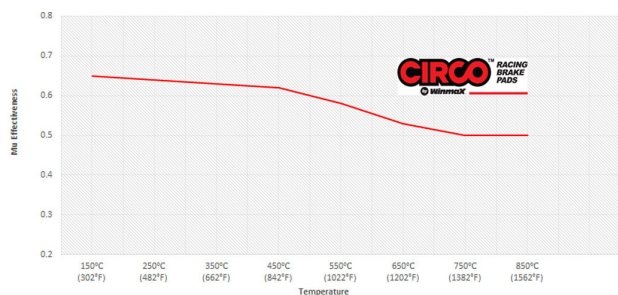

The compound has been rigorously tested in top level machinery including WRC, S2000 and GpN as well as historic and modern tarmac rally use. M119 displays excellent resistance to fade for those longer stages whilst offering brilliant levels of low temperature friction.

Temp Range	Friction	Material	Notes
50 - 800°C	0.48-0.51 <i>Mu</i>	Carbon Metallic	Rally

CIRCO Racing Brake Pads : Compound Information

CIRCUIT High Friction

Circo M127
Friction vs Temperature

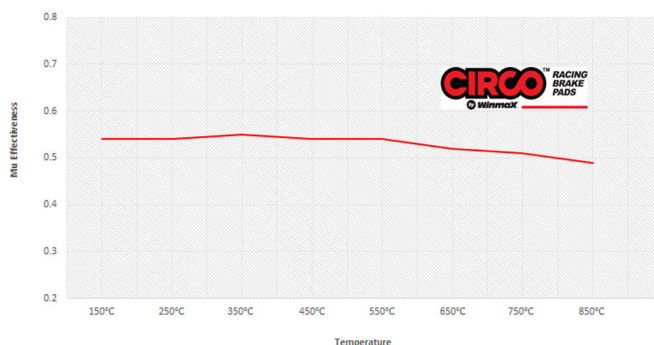

M127 is a pure circuit racing brake pad for enthusiast racers right through to semi-pro level. With some initial temperature introduced, this pad works right through to 850 degrees! High initial friction coupled with brilliant release characteristics mean this pad is for the drivers wanting to brake latest.

Temp Range	Friction	Material	Notes
150-850°C	0.55-0.62 <i>Mu</i>	Carbon Metallic	High Friction

HEAVY DUTY Professional

M207 is the Heavy Duty brake pad in the CIRCO range. This pad has exceptionally consistent torque characteristics at all temperatures making it a must have for professional circuit racing at the very highest levels. M207 is extremely capable at higher temperatures where other compounds simply give up.

Temp Range	Friction	Material	Notes
250-920°C	0.52-0.56 <i>Mu</i>	Carbon Metallic	Heavy Duty
